

## Wholesale SMS Services

Revolutionizing the telecommunications industry since 2004

Supplying Telecom service providers all over the world with network infrastructure that is secure and reliable. Our servers are in secure data centers, and our VoIP software solutions are made in-house. This means that our Telecom partners can be sure that they will always have a high-quality connection that can be adapted to their needs.

- 1 What is SMS services
- 2 Who is it for
- 3 Why Speedflow

## SMS wholesale services

High-quality SMS termination and Bulk SMS services. 1-hop and 0-hop connections to mobile operators, which offer great capacity, quick delivery, and competitive pricing

### SMPP & SS7 messaging

Giving users the ability to send and receive SMS messages to and from other phones, including GSM and CDMA phones. SMPP, which is an abbreviation for the Short Message Peer-to-Peer protocol, is used to keep the quality of service high.

End-to-end visibility of SMS traffic: track message failure/blocking GTs, Sender-IDs, and other metadata.  
Operations for GSM Messaging Protection (such as testing and grey route detection)

### A2P & OTP messaging

The amount of messages sent from applications to individuals (also known as A2P communication) is growing. SMS confirmations, alerts, real-time notifications, and other types of messages are included in A2P traffic.

End-to-end visibility of SMS traffic: track message failure/blocking GTs, Sender-IDs, and other metadata.  
Operations for GSM Messaging Protection (such as testing and grey route detection)

## Bulk SMS

Termination using A2P mobile marketing as an outbound, one-way communication. The system is able to process marketing and informational SMS traffic in bulk. Share information rapidly at competitive prices.

## Direct, Wholesale, SIM and HQ

Direct connections to mobile network operators all over the world, allowing for high-quality delivery and sender ID control. We guarantee the most competitive price-to-quality ratio in the business for our Wholesale SMS routes.

## Advantages

### Timely Payment

Customer satisfaction is a core value. Transparency, dependability and flexibility - all contribute to our long-term success.

### Professional Account Managers

Devoted, knowledgeable, multilingual account managers who operate in several time zones. Count on them for information regarding the availability of the route, its performance in terms of quality and any urgent issues.

### Technical support

Multilingual technical support specialists available around the clock. Prepared to quickly fix any problems with your network. They are always keeping an eye on the network infrastructure and resolving any issues you could have.
